

HOW TO BUILD BALANCE BOARD

by **Adrien Husson**
for the

This manual refers to the **RGB Lamp Demonstrator** project and is part of the **Movuno** documentation.

Project presentation:

<http://www.movuno.com/index.php/portfolio/rgb-lamp/>

All files of the project can be found on:

www.github.com/hssnadr/RGB-Lamp-Demonstrator

SET-UP

1 Download and install:

Movuino on www.movuino.com

PureData on www.puredata.info

Movuino

www.movuino.com

2  Run the RGBLamp firmware with **Arduino** and upload the program on the **Arduino UNO D1**

You'll need to install the **Adafruit Neopixel** library.

Sketch/Include a library/Manage libraries

Search for «Adafruit Neopixel» in the search tab and install the latest version

RGB-Lamp-Demonstrator/02_ArduinoFirmware/RGBLamp/RGBLamp.ino

3  Run the **RGBLamp.pde** file with **Processing** while the lamp is plugged on a USB port of your computer

You'll need to install the **oscP5** library: **Sketch/Import library.../Add a library...**

Search for «oscP5» in the search tab and the install latest version

RGB-Lamp-Demonstrator/03_ProcessingApplication/RGBLamp/RGBLamp.pde

4  Go to **line 40** into the **Processing** code and set the USB port where your **Arduino** is plugged

line 40 →

```
// Set serial communication with the RGB Lamp
println(Serial.list());
if (Serial.list().length > 0) {
  String portName = Serial.list()[0];
  arduinoRGBLamp = new Serial(this, portName, 38400);
}
```

5

Launch **Movuina** and set-up by following the **Quick Start** tutorial

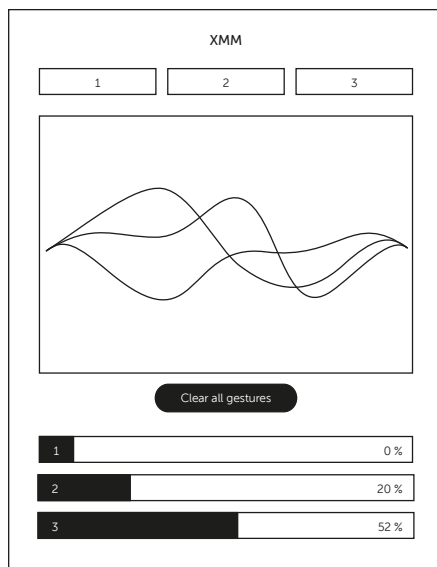

Quick Start

www.movuino.com/index.php/quick-start

Once its done, you can play with the **XMM** algorithm developped by **IRCAM**:

<http://ismm.ircam.fr/software/xmm-probabilistic-models-for-motion-recognition-and-mapping/>

← Record 3 different gestures

TIPS!

Shake quickly to erase colors in the Processing application

See the recognition in real time by reproducing your recorded gestures

OSC message (127.0.0.1 port 3000)
/gesture

13

The data are automatically sent to Processing and you can enjoy the reaction!
